
Qualifications Profile

I am an ambitious and passionate Flash developer with over three years of experience building Rich Internet Applications. I believe that innovation is an integral key to success and apply this way of thinking by creating outstanding technical concepts and developing efficient and re-usable object-oriented methodology. In my current position at a leading international advertising agency, I have been able to put into practice all aspects of Flash design and programming. Besides Flash, I also enjoy developing all kinds of creative HTML based sites with Javascript, PHP/MySQL and CMS (Wordpress, Magento).
